TCL2016: *the* practical, industry-oriented, event

Over 25 years, the International Conference on Textile Coating and Laminating has built a reputation as a vital meeting place for the worldwide coating and laminating industry. Very different from an academic research meeting, TCL is a venue for practical presentations focussing on what is happening in the industry today and what will happen tomorrow. Supplemented by intensive discussion sessions actively led by the session chairs, TCL is *the* meeting place for senior managerial, technical and marketing staff from the international coating and laminating industry.

The conference will answer important questions relating to industrial and technological issues such as: *How can electronic components be developed that can be integrated via lamination technologies* ♦ *How does coating and laminating technology contribute to the production of high-performance composites based on such as carbon and glass textiles?* ♦ *Why is the control of critical dimensional properties of materials becoming increasingly important to converters?* ♦ *Why are manufacturers switching from long- to short-chain fluoropolymers?* ♦ *How does a novel, thermally cured, dry technology offer an environmentally sustainable way to make durable high-performance fabrics?* ♦ *How can coaters, laminators and textile processors be sure antimicrobials have been effectively applied?* ♦ *Plus other topics to be discussed: opportunities in digital printing and coating - flame retardants in coating and laminating - multifunctional coating and laminating machines - hot melt adhesives for laminating - advances in breathable membranes and much more.*

Who should attend

- Managing Directors, CEOs, Presidents and other senior managers of companies involved with the textile coating and laminating industry, whether suppliers, processors, or end users.
- Technical Directors and managers concerned with the latest developments in fibres, fabrics, adhesives, films, polymers, coating and laminating techniques, converting, etc.
- Marketing Directors and managers who need to keep up to date with market developments and the prospects for coated and laminated textiles.
- Industry Analysts and others concerned with the future of the global textiles coating and laminating industry.

Venue: The venue for the 2016 meeting is the 4-star Hotel Novotel Praha Wenceslas Square, Prague, Czech Republic, on 16-17 March 2016. The hotel is ideally located in the centre of Prague just a short walk away from the National Museum and many other places of interest. The hotel has WIFI, an indoor heated pool and sauna. Parking is available for 550 CZK/day. The hotel is a modern and comfortable location for presentations, discussions and networking. A special discounted conference room rate has been negotiated (please refer to back page of brochure for more details).

Travel information: Václav Havel Airport is only 15km from the conference venue. Taxis are plentiful and reasonably priced and there are buses and airport shuttles to central Prague.

Conference Chairman: William C (Bill) Smith has over 47 years involvement in the textile industry in product and market development, sales, marketing and market management. He founded Industrial Textiles Associates (ITA) in 1986 and was the founder and developer of the Textiles Coating and Laminating conference series.

Conference organisers: International Newsletters Ltd is the world's principal publisher of information about textiles technology. The company runs the TNet web service as well as publishing Technical Textiles International magazine and three specialised newsletters, Advances in Textiles Technology, Medical Textiles and Smart Textiles and Nanotechnology.

PROGRAMME

Conference Chairman: *William C (Bill) Smith, Principal, Industrial Textile Associates (USA)*

DAY ONE: Wednesday 16 March 09.00 – 17.00

SESSION ONE: INDUSTRY ISSUES

Frederik Goethals, Centexbel (Belgium)

Technical properties of cellulose powder-coated textiles
Gizem Manasoglu, Uludag University, Department of Textile Engineering (Turkey)

Discussion session 2

DAY TWO: Thursday 17 March 09.00 – 17.00

SESSION THREE: TECHNOLOGY FOR GROWTH

Hyperbaric dry finishing technology for sustainability combined with high-performance
Gary S. Selwyn, President, Green Theme Technologies (USA)

Novel short chain (carbon C6) fluoroproducts with improved properties
Fikri Alemdaroglu, Business Manager Surface Modification, Daikin Chemical Europe GmbH (Germany)

Development of solvent free textile coatings
Gert Raeymackers, Operations Director, Vetex BV (Belgium)

Hot melt adhesives - a perfect combination for laminating
Guido Schürmann, Market Manager Coating & Laminating and Product Assembly EMEA, ITW Dynatec GmbH (Germany)

Advances in breathable membranes
Speaker to be advised

Responsive coatings
Brecht Demedts, Researcher Textile functionalisation and surface modification, Centexbel (Belgium)

Discussion session 3

SESSION FOUR: OPPORTUNITIES

Hydrophobic textiles in hospital design - a study on the cleaning and disinfection possibilities of coated textiles in hospital interior design
Jeppe Emil Mogensen, VIA University College (Denmark)

Advantages and drawbacks using nanomaterials in coatings
Aleksandra Lobnik, University of Maribor (Slovenia)

Integration of electronic functionalities into textiles by lamination technology
Margreet de Kok, Senior Researcher, Holst Centre (Netherlands)

Digital printing and coating - an opportunity
Speaker to be advised

Discussion session 4
